

MOHAMED ASHARUDEEN A

CAREER OBJECTIVES

Highly motivated and results-driven individual seeking an entry-level position in a dynamic and professional environment. Eager to learn and grow professionally while contributing to team objectives and achieving business goals. I'm looking for an opportunity to begin a career and make a meaningful impact, leveraging a strong analytical foundation and a data-driven approach to problem-solving.

SKILLS

- Python
- Java
- MongoDB
- Robotic Process Automation
- C++
- Tableau
- Front End
- Structured Query Language

EXPERIENCE

Artificial Intelligence and Machine learning & RPA

Intern 2024

Sprout Knowledge Solutions, Coimbatore

Worked on AI development projects and Robotic Process Automation. Gained hands-on experience with tools like UiPath, OpenCV, and automation scripts.

- Developed RPA scripts for automating Excel and file operations
- Participated in a mini-project integrating AI for decision automation

PROJECT

GateHost Hostel Management

2024

A full-stack web application developed using HTML, CSS, and JavaScript with a digital check-in/out system, data analytics, and student history monitoring

Secure Group Chat System

2023

Developed a secure platform for group communication using Arduino and the ESP8266 Wi-Fi module. The system allows multiple users to exchange messages over a wireless network with an emphasis on data privacy and secure transmission.
